

How to Clean Your Vacuum's Post-Motor HEPA Media Filter*

BISSELL Part # 203-6608

1. The post-motor HEPA media filter* assists in the filtration process to return clean air to the room. It is located behind the door on the side of the vacuum. If the filter becomes dirty, remove the door, remove the filter and replace.

NOTE: The post-motor filter is a white, pleated HEPA media filter. This filter is not washable and must be replaced when it becomes dirty.

*The filter media, not the vacuum as a whole, complies with the High Efficiency Particulate Air (HEPA) filter specification (EN 1822-1:2009)
