2. Slide down the lock tab and pull up the brush roll gate.
3. To remove brush roll, simply lift the brush out of the brush chamber. Clean off hair or other debris from brush roll.
4. Place cleaned brush roll back into foot of unit by aligning the brush roll end to the brush driver.
5. Replace the lock tab by pushing brush roll gate into place and slide up the lock tab to secure it.

**Brush roll reset:**
If larger debris becomes lodged in the foot of the unit and the brush roll shuts off, turn the unit off and remove the obstruction. Wait approximately 15 seconds for the motor to cool down before turning back on. Brush will function again after allowing time to cool down.
